

How to Use The Platform

Step 1: Upload a clear video, image and live stream that you want to deepfake. Ensure it follows our community guidelines.

Step 2: Select the transformations you want to apply (voice, facial features, etc.).

Step 3: Click Generate. This may take a few minutes as the AI processes your request.

Step 4: Review your deepfake. If you're happy with the result, you can download or share it with your friends!

Step 5: DO create fun, harmless content that's enjoyable for you and others.

Step 6: DON'T impersonate someone without their permission or use this for malicious purposes.
